PLASTIC PRODUCTS

A DIVISION OF BOURGALT INDUSTRIES LTD.

Fenderco Polymer Fenders

Free Form Plastic Products manufactures and distributes Polyethylene Plastic Fenders to fit graders, backhoes, big trucks and trailers. These fenders will outperform steel or aluminum and flex to accommodate vibrations or impacts. Their non-corrosive construction eliminates the need for painting. Salt, mud, snow, gravel, etc. are deflected to offer maximum protection and the smooth undersurface resists mud and snow build-up.

Industry Leading Designed Fenders

Low profile of rear fenders allows for doors to swing open for regular maintenance. Heavy-duty steel mounting brackets to securely fasten to frame

Fenderco Fenders offer

- ▶ Reduced broken windows and mirrors
- ▶ Fewer stone and other debris chips
- ▶ Reduces third party (public) liability
- ▶ Fenders most often fit replacement machines
- ▶ Quick and easy to remove for servicing
- ▶ Non-corrosive, will not rust, no need to paint
- ▶ More productivity, less cleaning for operator
- ▶ Built for heavy-duty use. (-40°C to +40°C)
- ▶ Manufactured with a “no slip” finished surface

Fenders for Trucks and Trailers

Fenderco truck and trailer fenders offer the best protection, quality construction and durability in the Industry. These Polymer fenders are non-corrosive and will outperform steel or aluminum. They flex to accommodate vibrations and impacts. Available to fit single, tandem and tridem axle combinations. Easily installed, low maintenance fenders to protect against stone and other debris damage. Contact Free Form Plastic Products for additional product information, availability and pricing. Dealer inquiries welcome.
