PLASTIC PRODUCTS

A DIVISION OF BOURGAULT INDUSTRIES LTD.

Portable Liquid Storage

The Portable Liquid Storage (PLS) unit was designed to meet the increasing demand for on-site liquid storage. The PLS is available in a variety of sizes ranging from 4000 imp. (4800 US) gallons to 7400 imp. (8880 US) gallons. This unit was designed with ease of operation in mind. A self-contained hydraulic system is standard to allow simple conversion from road to field and back. The tanks are heavy-duty cone bottom to allow for complete drainage of product and meet the demanding conditions of our customers. The unit is suitable for storage of a wide array of liquids including liquid fertilizer, liquid feed supplement, herbicide and also water for livestock or spraying operations. Whatever the need, the PLS meets the increasing demands for on-site liquid storage.

Industry Leading Design

An adjustable double clevis hitch is standard equipment on all models. Optional hitch choices include a pintle or a 2-5/16" socket. Added safety features include a double safety chain, optional light package, slow moving sign and side clearance reflectors. Tires are DOT rated for highway use.

Ball valves are located at the bottom of both tanks to allow complete control of the fluid and to help prevent the possibility of lost product. The valves are operated with ease using remote access handles located on the side of the unit. These handles are lockable to prevent vandalism or theft of the product.

Both tanks are conveniently connected to the front of the unit where central loading and unloading can be done. Heavy-duty Banjo fittings and valves are used throughout the unit making it very durable. Camlock connections are standard on all hose ends to allow removal of hoses for clean out. 2" plumbing is standard with optional 3" available upon request.

Each tank is secured with three (3) custom-made straps. The straps are bolted to the lifting lugs on the top of the tank with 1/2" bolts and secured to the cone with ratcheting buckles. The ratcheting buckles allow the easy but necessary adjustment to the strap tension, compensating for changing dimensions caused by temperature variations.
